Reference: Attachment 1 of 214 application - Response to question 9.

Dear Sir or Madam:

We respectfully request streamlined processing of our application to provide global long distance services.

Under the presumption of non-dominance, we should qualify for streamlined processing.

Vanilla Inc. is a new US based company seeking to establish long distance services to Europe, Middle East, Asia or any other country. It is affiliated with Global Quest Communications, in London England, to complete some international destinations. Vanilla's affiliation with Global Quest Communications is that they are both small business entities established by the same owner to connect the continents.

We are planning to launch our 1+ domestic long distance services, International 011 and 10-10-711 services on July 11, 2002.

Please do not hesitate to contact me if additional information is required.

Sincerely,

Mark D. Penman
Director, US Operations
(703) 790-2657
